Acceptable Use Policy and Agreement for Pupils

The internet and other digital technologies are a rich source of information and an essential part of 21st century life for education, business and social interaction. Internet access is an entitlement for pupils who show a responsible and mature approach to its use. The school has a duty to provide students with quality internet access as part of their learning experience and we do this with the understanding that rules are clear and understood by all.

This Acceptable use Policy is intended to ensure that:

Young people will be responsible users and stay safe while using the internet and other digital technologies. School systems and users are protected from accidental or deliberate misuse that could put the security of the systems and people using them at risk.

Acceptable Use policy Agreement and E-safety
